

GEMStar™ NW-25 ALD Vacuum Gauge Protector

Are you tired of having to replace your pressure gauge?

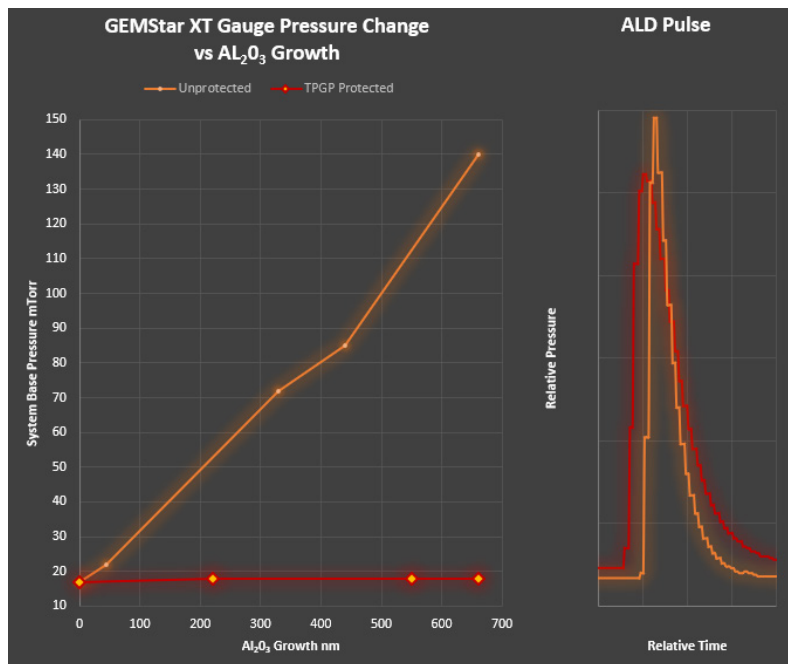

Our Vacuum Gauge Protector utilizing our patent pending TPGP™ technology is designed to dramatically increase gauge lifetime by preventing deposition material from reaching the gauge, with negligible impact on measurement performance. This NW-25 fitting is compatible with all GEMStar™ & GEMStar XT™ systems and other KF25 fitting solutions utilizing a centering ring.

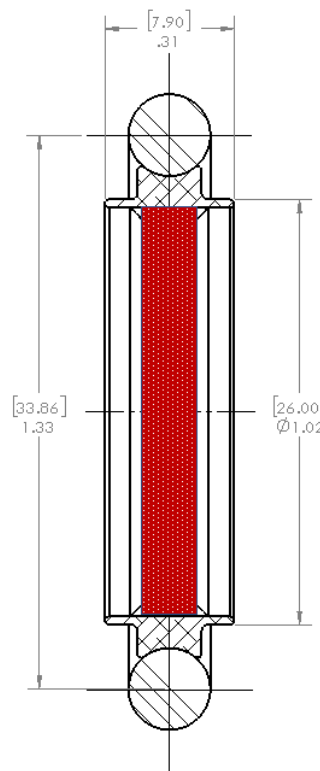

- ◆ Engineered specifically for GEMStar and GEMStar XT products
- ◆ Designed for flow through processes
- ◆ Replaces standard NW 25 O-ring retainer (Other connections available on request)
- ◆ Compatible with all Gauges with NW-25 interface
- ◆ Minimal real time ALD pulse effects
- ◆ Gauges sold separately

ARR-850402-KF25-GP Vacuum Gauge Protector Specifications

Compatibility	All GEMStar Systems
Size	NW-25
O-ring	Kalrez 7075

Long term results showing no change to system base gauge pressure reading after > 0.5 um of deposition will little impact on ALD pulse visualization during processing

Patent Pending
